To Whom it May Concern

Team Plus Build LLC (dba FS Group) was engaged in the Design - Build services for the turn key project for our 60,000 sqft warehouse developed on a 4 Acre parcel with a detention pond, completed in 2013. The scope included the design and construction management.

The building is a concrete Tilt-up structure with a raised concrete foundation. The warehouse has seven high bay loading doors for 18 wheelers to back up for unloading and loading.

The warehouse design included the steel rack layout system for stocking tires and the ESFR (Early Suppression Fast Response) Fire Sprinkler system to cover all the racks and the high stacks. The project was designed to our requirements and completed on budget and schedule.

The FS Group Team performed well and effectively collaborated with our team throughout the entire project. We would highly recommend their Design-Build services.

Sincerely,

Dev Lamba
